

Cyber Series Motorized Tensioned Ambient Light Rejecting Screen

The Motorized Tensioned Ambient Light Rejecting Screen features one-touch operation for easy control, saving space while offering convenience and aesthetics. Its flexible installation method allows it to fit seamlessly into various environments. Paired with a high-lumen projector, it delivers bright, vivid images even in natural home lighting. Transform any space into a high-end home theater with large screen projection and simple installation.

- Quasi-nano grade optical reflective coating: Controls the angle and amount of reflected light, ensuring vibrant colors under ambient light.
- High-definition picture quality
- 140° viewing angle
- One-touch operation: No complicated installation needed
- Suitable for standard projectors
- Ideal for: Living rooms, small offices
